CAREER OBJECTIVE

Seeking a challenging position in a dynamic and growth-oriented organization where I can leverage my professional experience and computer science knowledge to develop innovative solutions. I aim to continuously enhance my technical skills, adapt to emerging technologies, and contribute effectively to the success and growth of the organization.

WORK EXPERIENCE

HCL Technologies, INDIA

September 2025 – Present

Full Stack Developer

- Completed a 3-month Java Full Stack training program in Chennai covering Java, Spring Boot, Spring Data JPA, Spring Security, REST APIs, React, Bootstrap, and MySQL.
- Developed a full-stack project, "E-Commerce Application" using Spring Boot, React.js, and PostgreSQL, implementing REST APIs, CRUD operations, Spring security, user authentication, reviews, and ratings management.
- Built and consumed RESTful APIs to integrate the React frontend with the Spring Boot backend and implemented complete CRUD operations.
- Implemented authentication and role-based authorization using Spring Security to secure application endpoints and user workflows.
- Gained hands-on experience in full-stack development, including backend logic, frontend design, and database integration.
- Gained experience in enterprise application development, document template design, debugging, and production support.
- Continuously deepening expertise in core Java, Spring backend internals, and system design through self-directed study, applied alongside day-to-day engineering work.

EDUCATION

St. Martin's Engineering College

2021-2025

Bachelor of Computer Science and Engineering (Ai and ML)

GPA: 8.22

Narayana Junior College

2019 -2021

MPC

Marks: 970

Narayana High School

2018 -2019

SSC

CGPA: 9.7

CERTIFICATIONS

Python Full Stack Development - SSSIT

- Acquired expertise in Python, HTML, CSS, JavaScript..

Machine Learning Certification – Udemy

- Learned key ML concepts, including supervised and unsupervised learning, model evaluation, and optimization.

TECHNICAL SKILLS

Technical Skills: JavaScript, Python, Java, React Js, Machine Learning, MYSQL, Apache Kafka, Microservices Architecture, System Design Fundamentals, Scalability & Load Balancing.

Frameworks: Spring Framework, Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Spring Cloud.

Mark-up/XML Technologies: HTML, CSS.

Developer Tools: GIT, Visual Studio Code.

Soft Skills: Leadership, Adaptability, Collaboration, Empathy, Creativity.

PROJECTS

E-Commerce Web Application | Java, Spring Boot, Spring Security, React, Bootstrap, MySQL, REST APIs

- Developed a full-stack e-commerce application to manage product listings, user authentication, shopping cart operations, and order processing.
- Designed and implemented RESTful APIs using Spring Boot and Spring Data JPA to perform CRUD operations and integrate seamlessly with the frontend.
- Built a responsive and interactive user interface using React and Bootstrap to provide an intuitive shopping experience across devices.
- Implemented secure authentication and role-based authorization using Spring Security to protect application endpoints and manage user access. Integrated MySQL for efficient storage and retrieval of user, product, cart, and order data.

Order Processing Pipeline | Java, Spring Boot, Apache Kafka, PostgreSQL

- Built an event-driven order processing pipeline using Apache Kafka for asynchronous communication between services.
- Designed Kafka producers and consumers to handle order creation, inventory updates, and notification events.
- Implemented consumer groups and partitioning strategies to enable parallel processing and fault tolerance.
- Integrated Spring Boot with Kafka using Spring Kafka, with PostgreSQL for persistent order data storage.

MindGuard | Django, ML, HTML/CSS, JavaScript, Bootstrap, SQLite

URL: <https://github.com/Bhavyaneeraj/Mindguard>

- Built MindGuard, an AI-powered web app that detects early signs of child depression using browsing and social media data.
- Integrated machine learning for real-time risk prediction and behavior analysis.
- Used Django with SQLite for backend and data handling; implemented secure user authentication.
- Designed a responsive UI with Bootstrap and JavaScript, featuring dashboards, alerts, and trend tracking.

AI-Powered Future Skill Prediction | Python, Machine Learning, Deep Learning, Random Forest, DNN, Data Analysis, Industry Forecasting

URL: <https://github.com/Bhavyaneeraj/FutureSkillPrediction>

- Designed and implemented a predictive analytics system to forecast future skill demand across industries using multivariate classification techniques.
- Collected and preprocessed data from job postings, economic indicators, and industry trends to build a comprehensive dataset for training.
- Applied Deep Neural Networks (DNN) and Random Forest Classifier to predict emerging skills with high accuracy and interpretability.
- Evaluated model performance using classification metrics such as accuracy, precision, recall, and F1-score, optimizing for real-world applicability.

I hereby declare that all above information is in correct with fact or truth up to my knowledge and I bear the responsibilities for the correctness of the above-mentioned particulars.
